**OPTIMALE PRESTATIES EN EEN LANGERE LEVENSDUUR DANKZIJ GEAVANCEERDE TECHNOLOGIE**

Onze geavanceerde lichtbronnen zijn uitgerust met **Over Temperature Protection (OTP)**, een slimme beveiliging die ervoor zorgt dat de temperatuur altijd onder controle blijft. Wordt de lichtbron te warm? Geen zorgen! Hij dimt automatisch terug naar een veilig niveau en keert daarna weer terug naar 100% helderheid. Dit voorkomt oververhitting en verlengt de levensduur aanzienlijk.

Daarnaast is de lichtbron voorzien van een extra **heatsink**, waardoor warmte nog efficiënter wordt afgevoerd. Het resultaat? Betrouwbare prestaties, een langere levensduur van de elektronica en een duurzame investering in kwaliteit.

OPTIMAL PERFORMANCE AND EXTENDED LIFESPAN WITH ADVANCED TECHNOLOGY

Our advanced light sources are equipped with **Over Temperature Protection (OTP)**, a smart safeguard that ensures temperature control at all times. If the light source gets too warm—no worries! It automatically dims to a safe level and then returns to 100% brightness once conditions are optimal. This prevents overheating and significantly extends its lifespan.

Additionally, the light source features an extra **heatsink**, allowing for even more efficient heat dissipation. The result? Reliable performance, a longer lifespan for the electronics, and a durable investment in quality.

***Nominale levensduur LED:** De gebruiksomstandigheden hebben een grote invloed op de levensduur. Belangrijke factoren: omgevings-temperatuur, schakelfrequentie, vochtigheid, trillingen en spanning.

***LED Nominal Lifetime:** Usage conditions greatly impact lifespan. Key factors: ambient temperature, switching frequency, humidity, vibrations, and voltage.
